Ground Investigations
Under the Coal Industry Act 1994 any intrusive activities, including initial site investigation boreholes, and/or any subsequent treatment of coal mine workings/coal mine entries for ground stability purposes require the prior written permission of The Coal Authority, since such activities can have serious public health and safety implications. Failure to obtain permission to enter or disturb Coal Authority property will result in the potential for court action. Application forms for Coal Authority permission and further guidance can be obtained from the [Coal Authority Website](#).

Shallow Coal Seams

In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities. To check the site for coal mining features on or near to the surface the Coal Authority interactive map viewer allows the viewing of selected coal mining information graphically.
