1 Introduction

- 1.1 On 26th March 2020, the Minister for Housing and Local Government wrote to Local Planning Authorities (LPAs) to advise them that Planning Policy Wales (PPW) had been amended with immediate effect. The amendments removed the five year land supply policy and replaced it with a policy statement making it explicit that the housing trajectory, as set out in an adopted Local Development Plan (LDP), will be the basis for monitoring the delivery of development plan housing requirements as part of LDP Annual Monitoring Reports (AMRs).
- 1.2 The Minister also confirmed that Technical Advice Note (TAN) 1: Joint Housing Land Availability Studies (2015) had been revoked, and as a consequence there is no longer a requirement to undertake a calculation to determine whether a local authority has a five-year housing land supply. The requirement to provide a five-year supply of land for housing is therefore no longer a material planning consideration.
- 1.3 Following the advice contained within Edition 3 of the Development Plans Manual (DPM), which was published alongside the Ministerial letter, a housing trajectory has been prepared to consider the future delivery of housing. This would normally be published as part of the AMR, which would include a statement in respect of how issues in respect of the under-delivery of housing would be addressed.
- 1.4 However, the Minister wrote again to Local Authorities on 7th July 2020 in respect of Planning and the post Covid-19 recovery. The letter addressed a number of issues in respect of development plan preparation, including a statement that there would be no requirement for LPAs to submit an Annual Monitoring Report (AMR) to Welsh Government in October 2020. As a result, Caerphilly did not submit a full AMR. However, it is considered necessary to provide a statement on housing delivery and the Housing Trajectory, as this is one of the key issues that prompted a decision to undertake a review of the LDP in the 2019 AMR.
- 1.5 This Housing Delivery Statement sets out a number of key actions that should be considered in order to address the shortfall in the delivery of housing.

2 Annual Monitoring Report

- 2.1 The AMR is the key mechanism for assessing the extent to which LDP policies are working, including those in respect of housing. Where it is concluded that policies are not being implemented successfully, the AMR sets out recommendations on how this could be addressed, including recommending a Review of an adopted LDP where appropriate.
- 2.2 The Council has prepared eight AMRs to date, the most recent of which was agreed by Council in October 2019 (2019 AMR). It is evident from successive AMRs that new housing has not been delivered at the levels required. Policy SP14 indicates that there is a housing requirement for 8,625 new dwellings to be delivered over the 15-year plan period. This equates to an annual requirement of 575 dwellings per annum.
- 2.3 Due to the previous timescales for the preparation of the annual Joint Housing Land Availability Study, annual completions have historically been reported for the previous year (i.e. the 2018 JHLAS completion figures are reported in the 2019 AMR). However, the latest completion figures have been included in Appendix 1 of the AMR. Having regard for the 2019 completions data, the 8th AMR indicated that

4,835 units had been delivered (56% of the overall Adopted LDP total housing requirement) up to the end of March 2019. Therefore, there was a requirement for a further 3,790 dwellings to be developed over the remainder of the plan period, i.e. by the end of 2021, to meet the LDP housing requirement.

- 2.4 Following the receipt of the letter from the Minister for Housing and Local Government in July 2020, which stated that there would be no requirement for an AMR to be submitted to Welsh Government in October 2020, but LPAs could submit one if they wished, consideration was given as to whether it was appropriate to prepare an AMR for 2020, given the significant resources required for its preparation.
- 2.5 Data was been collected in respect of the monitoring indicators for the AMR for the monitoring period 1st April 2019 to 31st March 2020. The monitoring period was largely unaffected by Covid-19 restrictions, which began in March 2020, and therefore the data collected is largely reflective of the pre-Covid period. Whilst this information is useful, officers were mindful that Covid-19 has had and will continue to have wide-reaching impacts on many of the indicators in the plan, for example, vacancy rates in town centres; unemployment rates; out-commuting rates; average house prices; the number of new developments granted planning permission and usage of open spaces within the County Borough. It was considered that the preparation of an AMR for 2020, which uses data that does not fully reflect the current circumstances, would be of limited use. The 2021 AMR will contain data from both the 2019/20 and the 2020/21 monitoring years and will allow a clearer understanding of how the Covid-19 pandemic has affected the policy areas that are monitored through the AMR process.
- 2.6 Whilst a full AMR was not prepared this year, it is considered that a statement on housing delivery, identifying the number of dwellings completed within the 2019/20 monitoring period, and providing an assessment of forecasted future delivery will be beneficial for future decision making for the Planning Committee.

3 Requirement for a Housing Trajectory

- 3.1 In March 2020, Welsh Government published Edition 3 of the DPM, which required housing delivery to be assessed against the housing trajectory set out within an adopted LDP. In the case of Caerphilly County Borough Council, this is not possible, as the adopted LDP does not include a housing trajectory, as it was prepared before this was a requirement set out in national policy.
- 3.2 However, the DPM states that there will be a requirement for future AMRs to include a housing trajectory to measure housing delivery going forward. This should include monitoring:
 - The annual level of housing completion monitored against the average annual requirement (AAR) set out in the LDP, both in numerical and percentage terms.
 - Total cumulative completions monitored against the cumulative average annual housing requirement set out in the plan, both in numerical and percentage terms.
- 3.3 The housing trajectory should include robust information on the timing and phasing of both sites with planning permission and LDP allocations for the remaining years of the plan period.

4 Housing Stakeholder Group

- 4.1 The DPM requires that a Housing Stakeholder Group be set up to ensure completion figures are recorded correctly and to consider the timing and phasing of allocated LDP sites and sites with planning permission in respect of anticipated annual delivery rates.
- 4.2 The Group will also be involved in the preparation of a Housing Trajectory as an integral part of the 2nd Replacement Local Development Plan.
- 4.3 Membership of the group is a matter for each LPA to determine, but should ideally consist of relevant LPA departments, home builders, landowners (and agents where appropriate), Registered Social Landlords, statutory undertakers, infrastructure providers and other bodies as appropriate. The Terms of Reference of the Group has been included in Appendix 1.
- 4.4 A virtual meeting of the Stakeholder Group was held via Teams on 15th July 2020. The meeting was attended by:
- CCBC officers (Planning and Housing)
 - Home Builders Federation (HBF)
 - 3 National Housebuilders
 - 3 Registered Social Landlords
 - 4 Agents
- 4.5 The agenda, terms of reference and schedule of sites was also circulated to other stakeholders by email in advance of the meeting, and stakeholders who were unable to attend the meeting had the opportunity to make written comments on the documentation in advance of the meeting.
- 4.6 One comment was received after the meeting in respect of a site trajectory, and an amendment has been made to reflect the comment received. The comment related to the categorisation of the site rather than the forecasts.

5 2020 Housing Trajectory

- 5.1 In accordance with the guidance, LPAs who adopted an LDP prior to the publication of the DPM Edition 3 in March 2020 will need to create a housing trajectory based on the actual completions to date, and set out the timing and phasing of sites/supply in the remaining years of the plan period.
- 5.2 In September 2020, the LPA received a letter from Minister for Housing and Local Government, which clarified an important matter in respect of the expiry date of the adopted LDP. Following previous advice from Welsh Government, the LPA had previously considered that the adopted LDP would expire on 31st December 2021, at the end of the plan period. However, it has now been established that LDPs adopted prior to the 4th January 2016 (which includes the Caerphilly LDP) will remain the LDP for determining planning applications until they are replaced by a further LDP. For monitoring purposes, consideration will continue to be given to housing delivery during the plan period (2006-2021).

- 5.2 As there is only one full year of the plan period remaining, the housing trajectory has been extended for a further five years, up to 2025/26. Whilst this is not a requirement, it will form part of the evidence base for the 2nd Replacement LDP by identifying how many units are forecast to be delivered in the period between the end of the adopted LDP plan period and the adoption of the 2nd Replacement LDP. It is also beneficial in allowing other service areas (e.g. education, health, utility providers etc) to identify where new housing is likely to be developed to inform longer-term service planning.
- 5.3 The guidance indicates that where an adopted LDP does not include a trajectory, past completions and forecast completions should be assessed against a straight line Average Annual Requirement (AAR). In the case of the Caerphilly adopted LDP, the AAR is 575 dwellings per annum.
- 5.4 The housing trajectory graph identified in Figure 1 below has been derived from the following elements, as required by the DPM:
- The timing and phasing of allocations (Appendix 2);
 - The timing and phasing of sites with planning permission (referred to in the DPM as Appendix 3);
 - Actual annual completions compared with the Average Annual Requirement (Appendix 4);
 - Completions up to 2019/20 and forecasts for the remaining full year of the plan period and 5 further years (compiled from Appendices 2, 3 and 4).

Figure 1 – Housing Trajectory Graph

- 5.5 The Housing Trajectory Graph in Figure 1 shows that the number of dwellings that have been constructed each year have been consistently below the annual average requirement (AAR) of 575 dwellings per annum for every year since 2008-9. The economic crash and subsequent recession have had a significant impact on housebuilding across the County Borough and build rates have not recovered to the levels delivered at the start of the plan period.
- 5.6 In 2019/20, the housing completion figures was 336 dwellings, which was substantially higher than the previous year (2018/19) of only 122 dwellings but is still significantly lower than the AAR (41.6% lower than the requirement). Several large sites are currently being developed out by major housebuilders (including Hawtin Meadows in Pontllanfraith, Pandy Road in Bedwas, the former Bedwellty School site in Aberbargoed and Oakdale Golf Club), and these have provided a significant proportion of completions for 2019/20. It is anticipated that these sites, together with other sites with recent planning permissions (including Cwm Gelli in Blackwood, Virginia Park in Caerphilly and Hendredenny in Caerphilly) will deliver a large number of units over the next few years, but even including these sites the forecast completions for 2020-21 (the last full year of the plan period), are anticipated to remain well below the AAR.
- 5.7 As a consequence of the low levels of annual completions, the cumulative total of dwellings that have been developed is considerably lower than the number of dwellings that the plan makes provision for based on a straight-line AAR trajectory of 575 dwellings per annum (Figure 2). At this point in the plan period (14 years), it would be assumed that 8,050 dwellings would have been constructed. However, only 5,171 had been built up to 2019/20, equating to 64.2% of the housing requirement that would have been expected at this point in the plan period. This is a shortfall of 2,879 dwellings, or 35.8% below what should have been delivered, with only one full year of the plan period remaining.

Figure 2: Cumulative completions compared to cumulative housing requirement

- 5.8 The forecast completions after the LDP plan period has ended are anticipated to continue to remain lower than the AAR. The full impact of the Covid-19 pandemic on

the housebuilding industry in the long-term is clearly unknown at present, and there is inevitably a degree of uncertainty regarding any trajectory, as the economy seeks to recover from the impacts of Covid 19. National policy decisions on matters such as the Help to Buy scheme and land transaction tax has the potential to influence the sale of new homes and overall housing delivery, together with the availability of funding for the provision of affordable housing. The forecasts post 2021 include lower rates of completions on certain sites, where appropriate, to reflect the current situation. Whilst the figures have been agreed by the Housing Stakeholder Group, it is acknowledged that, due to the current crisis, they can only be a 'best guess' at a point in time.

6 Recommendations

- 6.1 The DPM indicates that the LPA must set out what action (where relevant) is being undertaken to address any shortfall or under delivery in respect of the housing trajectory. This would normally be included within the AMR, but in light of Ministerial letter and decision not to prepare an AMR this year, these actions are set out within this Housing Delivery Statement, the recommendations of which will need to be endorsed by Council.
- 6.2 The 2019 AMR process identified that 2 housing policies, namely: SP14 Total Housing Requirements; and SP15 Affordable Housing Target, were not being implemented as anticipated and required action to be taken. It also identified that one objective, namely Objective 9, which seeks to: *“Ensure an adequate and appropriate range of housing sites are available across the County Borough in the most suitable locations to meet the housing requirements of all sections of the population”* was not being met.
- 6.3 The 2019 AMR recommended that the appropriate response to addressing the shortfall in housing was to undertake a review of the adopted plan. Since the 2019 AMR was agreed by Council in October 2019, a Review Report has been prepared and was subject to public consultation. The Review Report concludes that the Council should commence an immediate full revision of the LDP.
- 6.4 The preparation of a Delivery Agreement (DA) is a key requirement in preparing a revised LDP. The DA provides details of the stages involved in the plan-making process, the time each part of the process is likely to take, and the resources that the Council will commit to Plan preparation. The DA will also establish the Local Planning Authority's early full and continuous approach to community engagement and involvement in the preparation of the 2nd Replacement LDP. In March 2020, the Council commenced a public consultation on the draft DA, but following the restrictions associated with Covid-19 the decision was made to cancel the consultation and consult on a revised DA once restrictions were eased. The crisis has had an impact on the timescales for the adoption of the 2nd Replacement LDP and it is now anticipated that a new Plan will not be in place until late 2024 at the earliest.
- 6.5 Even though work on a Replacement LDP has commenced, there is still a need to increase the delivery of housing in the short term, which will require other interventions or actions to address the issue.
- 6.6 Recommendation R3 of the 2019 AMR set out a number of proactive measures aimed at increasing housing delivery, and the merits of these remain relevant, with

recommendations form the basis of the following recommendations of this Housing Delivery Statement.

- 6.7 In order to address the shortfall in housing delivery, as highlighted in the Housing Trajectory, it is recommended that:

In the period up to the adoption of the 2nd Replacement LDP, the Council will continue to address the shortfall in housing delivery through proactive action, including:

- **Considering proposals for new residential development on their relative planning merits on a site-by-site basis and having due regard for the need to increase the delivery of housing;**
- **Working with Welsh Government and the Cardiff Capital Region to bid for funding aimed at facilitating the redevelopment of sites with high infrastructure and/or remediation costs for housing;**
- **Utilising the innovative funding model to bring forward Council owned sites with viability issues;**
- **The identification of schemes through the Regeneration Project Board where funding opportunities could be exploited to deliver regeneration projects, including for housing and employment;**
- **Supporting the development of new build Council housing on appropriate sites;**
- **Working to ensure new housing complies with high environmental standards to help address the climate emergency.**
- **Accelerate the development of the Council's own house building plans to offer mixed housing tenure opportunities on appropriate sites across the county borough.**

Appendix 1 – Housing Stakeholder Group Terms of Reference

Housing Stakeholder Group

Terms of Reference

June 2020

Purpose

The Housing Stakeholder Group will consider site specific information on housing delivery with the aim of agreeing the timescales for the delivery of future housing within the County Borough. The Group will also provide input into the preparation of a housing trajectory for the Deposit 2nd Replacement Local Development Plan (LDP).

Objectives

On an annual basis the Housing Stakeholder Group will:

- Agree completions figures for small and large sites for the previous monitoring year (1st April to 31st March);
- Forecast the anticipated annual delivery rates for sites with planning permission and sites deferred for the completion of Section 106 agreements (where it is anticipated that the site will be delivered in the short term);
- Forecast the anticipated annual delivery rates for housing allocations in the adopted LDP.

In addition, the Group will also:

- Discuss the timing and phasing of sites proposed for inclusion in the Deposit 2nd Replacement LDP;
- Provide input into the preparation of a housing trajectory for the Deposit 2nd Replacement LDP.

Membership

The Development Plans Manual (Edition 3, March 2020) states “*membership of the group is a matter for each LPA to determine, but should ideally consist of relevant LPA departments, home builders, land owners (and agents where appropriate), Registered Social Landlords, statutory undertakers, infrastructure providers and other bodies as appropriate.*”

For Caerphilly CBC it is considered that the Housing Stakeholder Group should comprise representatives from the following:

- Planning Department, CCBC
- Property Services, CCBC
- Housing, CCBC
- Home Builders Federation (HBF)

- Private sector developers
- Planning consultants
- Landowners and their agents
- Developing Registered Social Landlords (RSLs)
- Dwr Cymru/Welsh Water

Where large sites are submitted and considered through the candidate sites process for the 2nd Replacement LDP, the Local Authority will work with individual landowners to seek to prepare an agreed position in respect of the trajectory and phasing of the sites. The wider stakeholder group will also have the opportunity, through the Stakeholder meetings, to provide input on site specific trajectories.

Quorum

The Housing Stakeholder Group is an advisory body and as such has no decision-making powers. As a result, there is no requirement for the group to have a quorum for meetings. It is, therefore, proposed that no quorum be set for the Group meetings.

All documentation, including an agenda, sites schedule and completion figures, will be circulated to the Housing Stakeholder Group at least two weeks before the date of the meeting. Written responses will be accepted in respect of the sites schedule.

Chair

The meeting will be chaired by the Local Planning Authority.

Meeting Format

Due to the restrictions associated with the Covid 19 outbreak, the 2020 meeting will be held virtually using a meeting platform such as Teams.

Subsequent meetings will either be held virtually or at the Caerphilly CBC offices.

Meetings to agree the annual completions figure and to consider the anticipated annual delivery rates for future years will be held on annual basis in June/July, so that the information can be agreed prior to the submission of the Annual Monitoring Report (AMR) to Welsh Government by the end of October each year.

There may be a need for additional meetings to provide input into the preparation of a housing trajectory for the Deposit 2nd Replacement LDP. Notice of any additional meetings will be given at the earliest opportunity, with a minimum notice period of two weeks.

Disputes

The council will be responsible for making decisions where there is disagreement on the timing and phasing of sites. No group member will have a veto on the content of the AMR. However, where there are outstanding areas of dispute/disagreement, which should be limited in number, these will be recorded within the AMR. Every effort should be made by the Group to achieve consensus on the timing and phasing of sites in the plan period.

Reporting Mechanism

The Housing Trajectory will be reported to Council as part of the AMR in October of each year.

The 2nd Replacement LDP will be reported to Council at various stages in accordance with the timetable set out with the emerging Delivery Agreement.
