#### **CABINET - 4TH FEBRUARY 2015**

SUBJECT: PUPIL ATTAINMENT AT FOUNDATION PHASE, KEY STAGE 2, KEY

STAGE 3 AND KEY STAGE 4 (2014)

REPORT BY: EDWARD PRYCE, CHALLENGE ADVISER (EAS)

#### 1. PURPOSE OF REPORT

1.1 The report is to inform members of pupils' attainment in teacher assessment at Foundation Phase, Key Stage 2, Key Stage 3 and final Key Stage 4.

#### 2. SUMMARY

- 2.1 All schools are subject to rigorous reporting and monitoring of standards each year, with the principal focus in key stages 2 and 3 being on English/Welsh first language, mathematics and science, and the percentage of pupils achieving the expected level in all three core subjects (core subject indicator CSI).
- 2.2 In the Foundation Phase (formerly key stage 1), following the implementation of a revised curriculum, schools reported for the first time in 2012 on the performance of 7 year olds in language, literacy and communication (English or Welsh language) (LLC), mathematical development (MD), and personal and social development, wellbeing and cultural development (PSDWCD). The foundation phase indicator (FPI) measures the percentage achieving the expected outcome in all three areas of learning.
- 2.3 Whilst assessment of LLC and MD is broadly comparable to performance in English/Welsh and mathematics at KS2 and KS3, PSDWCD is not the same as science. Instead it provides a holistic assessment of pupils' wellbeing and the extent to which they are able to inter-relate appropriately with those around them. It also reflects a growing awareness of culture and diversity and of the environment in which they live. As such, it is an important measure of their overall 'readiness' for learning. Achievement in each of LLC, MD and PSDWCD is measured in relation to one of six 'outcome' descriptors.
- 2.4 The 'average' pupil is expected to achieve outcome 5 by the end of the foundation phase (formerly national curriculum level 2), with more able pupils achieving outcome. 6 (formerly level 3). At the end of key stages 2 and 3, the 'average' pupil is expected to achieve level 4 and above and level 5 and above respectively and more able pupils are expected to achieve level 5 and 6 respectively.
- 2.5 At Key Stage 4 all schools are subject to rigorous reporting and monitoring of standards each year. The following key performance measures are used to evaluate and compare the full range of achievement within and across local authorities:
  - Level 2 threshold including English or Welsh first language and mathematics
  - Level 2 threshold
  - Level 1 threshold

- CSI (Core Subject Indicator)
- Capped points score (replacing the previous Average Wider Point Score measure)
- Level 2 qualification (equivalent to GCSE A\*-C) in English or Welsh first language
- Level 2 qualification (equivalent to GCSE A\*-C) in mathematics
- Level 2 qualification (equivalent to GCSE A\*-C) in science.
- 2.6 Of these, the Level 2 threshold including English/Welsh first language and mathematics and the capped point score are particularly important and WG publishes local authority benchmarks based on these each year.
- 2.7 Both national and global research shows that there is a significant link between socioeconomic background and educational performance. The Welsh Government's statistical
  bulletin, "Achievement and Entitlement to Free School Meals in Wales", published every
  March, shows that the performance of pupils eligible for free school meals (FSM), which is a
  measure of socio economic deprivation, is lower than for their non eligible counterparts at all
  key stages. The Welsh Government therefore uses the percentage of pupils eligible for free
  schools meals as a proxy indicator of deprivation for both individual schools and local
  authorities.
- 2.8 According to the latest available figures for the percentage of pupils eligible for FSM, Caerphilly is the 3<sup>rd</sup> most socioeconomically disadvantaged LA in Wales. This contextualisation is not used to reduce ambition, nor to set limiting targets, but to show that if Caerphilly performance is higher than 20<sup>th</sup>, then performance is better than expected. Our aspiration is still to improve our position in local authority ranking tables in spite of deprivation levels, overcoming the link between deprivation and poor attainment.
- 2.9 A detailed analysis of the performance of Caerphilly pupils is contained within the main report.

#### 4. THE REPORT

#### **4.1** Foundation Phase

4.1.1 Performance in the foundation phase continues to improve, with 88.5% pupils achieving the foundation phase indicator (FPI), an increase from 85.0% in 2013. Caerphilly currently ranks 6th in Wales for the FPI when compared with other local authorities, which is significantly above the LA's FSM ranking (20th, 2014 PLASC data).

4.1.2 There have been improvements at both the expected level (outcome 5+) and at the higher level (outcome 6) in all indicators.

- 4.2.13 Gender differences have reduced for the expected level 4+ in CSI, English and Welsh (first language) but increased in mathematics and science. Whilst both genders have improved, girls have improved at a faster rate.
- 4.2.14 At the higher level 5+ the gender gap has also reduced for English, Welsh (first language) and mathematics where girls' performance is now higher than boys. In science the gender gap has increased at the higher level 5+ due to a greater increase in girls' performance.
- 4.2.15 Wales rankings: Improvements in performance have increased the LA's rankings against other LAs in Wales in mathematics and science. The LA's rankings have declined by one place for the CSI and Welsh (first language) due to a greater rate of improvement in other LAs.

#### 4.3 Key Stage 3

4.3.1 Performance continues to improve, with 77.6% pupils achieving the core subject indicator (CSI), a significant increase from 73.5% in 2013. There was also a significant increase in performance across Wales and Caerphilly is now ranked 18th in Wales.

4.3.2 Performance has improved across all indicators at the expected level 5+ and at level 6+. This bodes well for future pupil achievement at key stage 4.

- 4.3.17 The gender difference at level 7+ declined in Welsh (first language), mathematics and science. The decrease in Welsh (first language) and mathematics was due to a decline in girls' performance. The gender gap for English increased due to a decline in boys' performance.
- 4.3.18 Wales rankings: Whilst improvements have been made in all subjects and indicators, due to a significant increase in performance across Wales, Caerphilly's rankings remain at 18th for the CSI and 20th for English, and have declined by one place for Welsh (first language) and two in mathematics. The LA ranking has improved by two places in science.

#### 4.4 Key Stage 4

4.4.1 Key stage 4 results indicate continued progress in 2014 with increases in all indicators The proportion of pupils achieving the Level 2 threshold inclusive of English/Welsh first language and mathematics has improved from 46.3% in 2013 to 50.0% in 2014. This places Caerphilly 20<sup>th</sup> in Wales for this indicator.

4.4.2 This increase is supported by increases in the Level 1 and 2 thresholds overall, the CSI, Capped Points Score and in English, Welsh (first language) mathematics and science.

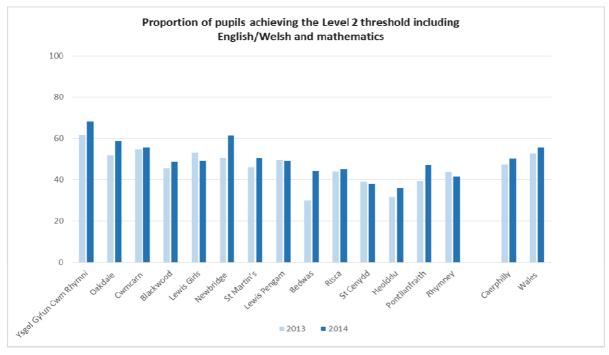

4.4.3 Despite improvements in all indicators with improvements at a greater rate than the national average in the majority of indicators, Caerphilly's rankings compared with other LAs across Wales remain broadly similar to 2013. This is due to accelerated improvements at key stage 4 in many LAs across Wales. Caerphilly's rankings have improved by one position for the Level 1 threshold and the CSI, but declined by one position in Mathematics.

Note: The overall Caerphilly figure for Welsh first language is different to Ysgol Gyfun Cwm Rhymni's performance for 2013 as one other school entered pupils for Welsh first language examination. This school's results are not reported as the number of pupils is fewer than 5 and therefore publication of the results could lead to the identification of individual pupils' results.

4.4.5 The gender gap increased in 2014 for the Level 2 threshold inclusive of English/Welsh first language and mathematics from a 5 points gap in 2013 to a 12.6 points gap in 2014, above the Wales average of 8.3 points. This is the first time the gap has been wider than across Wales in the last five years. This gap has increased due to the significant acceleration of girls' performance and a slight decline in boys' performance. The gender gap also increased for the Level 2 threshold, Level 1 threshold, capped points score, CSI, English, mathematics and science, with gender differences for these indicators now above the Wales average.

4.4.6 When FSM benchmark data is used to compare the performance of similar schools, the proportion of schools above the median remained above average for the Level 2 threshold including English/Welsh and mathematics at 65% and the number of schools in the bottom quarter remained below average at 2 schools (14%). However, the number in the top quarter reduced from 4 in 2013 to 1 in 2014 and the number of schools above the median for the

Level 1 and 2 thresholds, the CSI and the Capped Points Score reduced. The number in the bottom guarter increased for these indicators, as did the number in the top guarter.

4.4.7 The proportion of schools with core subject performance above the median is average for mathematics at 50%, and below average for English (36%) and science (43%). Despite improvements in raw performance, the number of schools above the median and in the first quarter declined in each of these core subjects and the number in the bottom quarter increased.

4.4.8 The LA benchmarks for performance modelled on FSM entitlement has been met or exceeded for the Level 2 threshold including English/Welsh and mathematics for the past five years. Performance has been just below the LA benchmark for the Capped Average Wider Point Score and this gap widened in 2014.
